

Why Join the Lumicell Team?

Everyone has been affected by cancer in some way. We at Lumicell believe in the importance of developing a product that is designed to ensure complete clearance of cancer cells while sparing healthy tissue, increasing physician and patient confidence in surgical outcomes and subsequent quality of life. Working on a combination drug-device product exposes us to a wide range of medical product design challenges. Lumicell solves complex, scientific problems by engaging multiple disciplines, including optics, electronics, software, mechanics, biomedical engineering, and clinical trials. Our expanding team and open collaborative space allow us to face these challenges head on in order to provide a high-quality product with cutting edge technology that we are proud to put our company name on.

Driven by our passion and promising clinical data to improve the lives of cancer patients, we operate as a driven, unified team. A walk through our facility captures the collaborative effort we put forth daily from both a product and cultural standpoint, from the engaging cross-functional brainstorming to the group effort on completing 1000-piece puzzles; even our office dogs are excited to come in to work each day. We are dedicated to developing solutions to the clinical unmet need to cancer surgery, in a fun environmentally friendly space, surrounded by smart people.

We welcome all with enthusiasm and an open culture of acceptance; taking pride in each of our employees and appreciating the diversity of backgrounds and opinions they bring. We strive for equality in all aspects of our business and hiring; and we are proud to have achieved 100% pay equity for women before it was mandated by the Commonwealth of Massachusetts!

We believe that our interns are a great asset, so we offer great benefits which include:

- Small company where you have an opportunity to make a **BIG** impact.
- Complimentary on-site garage parking and easy access to public transportation
- Creative outlets through our activities committee which hosts various company milestone celebrations, as well as recreational and educational events
- Community service events with local groups such as Susan G. Komen, Cradles to Crayons, etc.
- Our weekly Journal Club gives employees an opportunity to present any topic of their choice to educate their peers and spark fascinating discussions. (some past topics have included Sterile Neutrinos, Vulnerable Plaque and the NIRS-IVUS detection, Memory Editing, and the Effect of Multiculturalism/Multilingualism on Personality)
- Dog-friendly office space
- Complimentary yummy snacks and beverages
- Stay-active space with table tennis, foosball, and video games

If this sounds like a place you would like to work at, then our fun-loving, cancer fighting Lumicell family happily welcomes your application

Why Join the Lumicell Team?

Testimonials:

"Lumicell has been a great platform for me to hone my theoretical skills and learn its practical value. Being an International student, working in a foreign land sounds scary, but Lumicell has been so welcoming and makes me feel like I belong here. It's a growing company and I would say it's the best place to learn."

~ Hrishika Maharishi (Quality Intern)

"Interning at Lumicell has been an incredibly interesting, challenging, and rewarding experience. The team here at Lumicell is very welcoming and collaborative, always keeping in mind our mission to improve the lives of future cancer patients in every decision at all levels of the company."

~ Jake Whitney (Clinical Affairs Intern)
